

Komara 7

VIKOMA

Oil recovery solutions since 1967

Quality
Reliability
Innovation

Ensuring an effective solution to your oil spill requirements!

- The ultimate in portability, the Komara 7 can easily be carried by one person
- Ideal for use in remote or difficult to access areas and shallow waters
- Can be used in restricted spaces such as marinas or around jetties
- Compact and easily portable

For more information on Vikoma recovery skimmers please visit www.vikoma.com

Vikoma has developed the design and use of oleophilic disc technology to provide highly efficient recovery of oils with minimal water pick up.

Vikoma's Komara range of oleophilic disc skimmers are probably the best known and most widely used skimmers in the world.

The Komara 7 is a highly efficient oleophilic disc skimmer designed to recover floating oils and other substances from water. The skimmer is robust, stable and yet highly portable thanks to its advanced design and use of modern materials.

Due to its compact size, the Komara 7 can be used in almost all inland and shoreline areas including ports and harbours, waste oil pits, beach operations, inland water ways, ponds, lakes, marshes, mangroves and any similar environment where oils are required to be removed from water.

The Komara 7 skimmer has a bank of discs which will recover oil at up to 7m³ per hour, with less than 2% free water pick up. The recovery rate of the skimmer has been independently tested and is certified by Lloyd's.

The system is supplied with a floating

transfer pump, rated at 7m³ per hour which floats close to the skimmer to transfer recovered oil to suitable storage. The Komara 7 system can also be supplied with a static pump, ideal for use from pontoons or jetties.

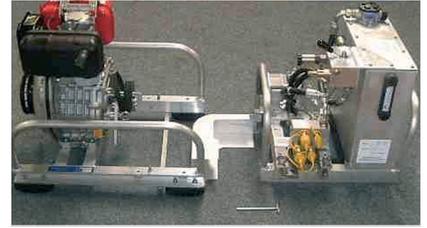

Vikoma's GP7 powerpack provides hydraulic power to drive the skimmer head and the pump. The powerpack has a unique two part configuration, so it can be carried into position by two people.

The complete Komara 7 system comprises a Komara 7 skimmer head, GP7 hydraulic powerpack, floating pump and hose kit.

The Komara 7 skimmer is also available as an electric or pneumatic system.

Product Benefits:

- Compact, light weight & easily portable
- Ideal for use in difficult to access areas
- Highly efficient disc skimmer

Capacity
7m ³ per hour
System components
Komara 7 Skimmer Head GP7 Diesel Hydraulic Powerpack IMP 50F Floating Hydraulic Transfer Pump Hose Kit
Optional extras
Komara 7 Electric Version (ask for details) Available with IMP50 Static Pump
