

# Komara 50

Protecting our environment for 50 years

Quality  
Reliability  
Innovation

Ensuring an effective solution to your oil spill requirements!

- Robust design ideal for open waters
- Ideal for use in ports and harbours, shoreline operations and coastal waters
- A self contained, versatile skimming system
- It has six independent disc (or interchangeable brush) banks to give 360° coverage around the skimmer

Vikoma has developed the design and use of oleophilic disc technology to provide highly efficient recovery of oils with minimal water pick up.

Vikoma's Komara range of oleophilic disc skimmers are probably the best known and most widely used skimmers in the world.

The Komara 50 uses proven disc skimming technology to recover oils at more than 52m<sup>3</sup> per hour with less than 2% free water pick up.

The stable, robust design makes the Komara 50 ideal for use in open waters in wave heights of up to 2m, as well as in more sheltered locations. It has been used around the globe by emergency response organisations, responders, coastguards and governments.

The skimmer is constructed from FRP, stainless steel with marine grade aluminium floats to keep its weight to a minimum whilst maintaining strength.

The Komara 50 has a powerful on board positive displacement pump. The pump can deal with the heaviest oils and is resistant to running dry. The rate of discharge is automatically controlled by the on-board float valve, so it does not require constant operator input.

The Komara 50, like all of our disc skimmers, can recover a wide range of oils, from very light oils right up to high viscosity crudes, which makes it an extremely versatile skimmer for a wide range of applications.

The Komara 50 is powered by Vikoma's GP35 powerpack. This powerful water cooled diesel driven powerpack drives the variable speed transfer pump and the disc banks.

#### Product Benefits:

- High capacity oil recovery
- 50 m<sup>3</sup> / hr with 98% oil pick up
- Robust design ideal for open waters

#### Capacity

50m<sup>3</sup> per hour

#### System components

Komara 50 Skimmer Head with Integral Lobe Pump.  
GP35 Diesel Hydraulic Powerpack.  
Hose Kit.

#### Optional extras

Also available as containerised systems. Option of 1 or 2 systems per 10ft container.
