

MODEL NO.

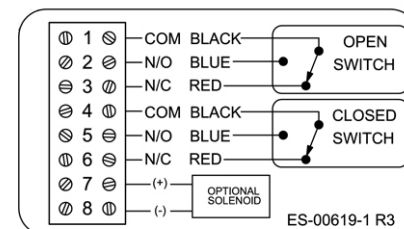

**TXP-M21GNMM**

PRODUCT LINE

**Valvetop Discrete Valve Controller**

SPECIFICATIONS

|                            |                                                                                                                            |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>Model</b>               | Valvetop Model TXP, epoxy-coated A360 Aluminum enclosure with dichromate coating                                           |
| <b>Bus Sensor</b>          | (2) Mech SPDT (10A@250VAC)                                                                                                 |
| <b>Area Classification</b> | Explosion Proof CI I Div 1&2 Grps C, D; CI II Div 1&2 Grps E-G / Flameproof; ATEX/IECEx II2GD Ex d IIB; Ex tD A21, IP66/67 |
| <b>Visual Display</b>      | 90° Green Open / Red Closed                                                                                                |
| <b>Shaft</b>               | NAMUR, 304 Stainless Steel                                                                                                 |
| <b>Conduit Entries</b>     | (2) M20                                                                                                                    |
| <b>O-Rings</b>             | Silicone                                                                                                                   |
| <b>Temperature Rating</b>  | -40 °C to 80 °C                                                                                                            |
