

Easy to use compact design with comprehensive features

Rion's priorities for on-site measurements are speed, ease of use, quality and reliability.

The New NA-28 is the top of the Rion range of sound level meters and analyzers. It combines cutting edge technology with excellent quality and unrivalled ease of use.

System constitution

Key Capabilities

Real Time Octaves (16 Hz to 16 kHz) or 1/3 octaves (12.5 Hz to 20 kHz)

Real Time Simultaneous Octaves (16 Hz to 8 kHz) and 1/3 Octaves (12.5 Hz to 12.5 kHz)

Data stored as text files direct to CF card

Measures and logs L_{eq} , L_{max} , L_{min} and 5 percentile values (L_N) in octaves and/or 1/3 octaves

Auto Stores 300 000 data sets or 1 000 hours of 1 second 1/3 octaves onto 2 GB CF card

Auto Stores 1 000 data sets or 10 000 of 1 second 1/3 octaves to internal memory

Manual Storage for 1 000 data sets internally or 100 000 data sets to 2 GB CF card

Linearity 110 dB in Sound Level Meter Mode and 95 dB in Analyzer Mode

16 hours battery life with 4 Alkaline 'C' Cells

Main and Sub-Channel for simultaneous selection of 2 time or frequency weightings

F (Fast), S (Slow), 10 ms Time Weightings plus Peak & Impulse on Sub-Channel

Data transfer using CF card or USB (meter/CF card appearing as virtual disk)

Measurement can be started by internal or external trigger

Comparator output to trigger external devices

AC and DC outputs of main and/or sub-channel

Expandable functionality using programme cards

Key Options

Building Acoustics Programme Card

Uncompressed WAV file recording Programme Card

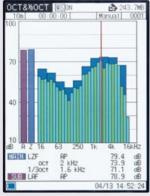

Flexible user interface

- CF card slot
- 2 Infrared remote control sensor
- 3 AC adapter terminal
- 4 Two-way trigger input/comparator output terminal
- 5 AC output terminal
- 6 DC output terminal
- 7 USB terminal

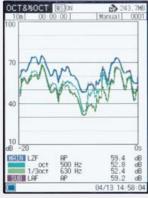

[Terminals on lower surface]

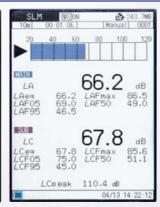

Screen display-Example

Analysis mode screen (Simultaneous 1/1 & 1/3 octave band display)

Time versus level display with 1/1,1/3 octave analysis

Sound level meter mode screen (Sound level display)

Menu list screen

Infrared Remote Control

Memory Card 128 MB MC-12CF1 SUPPLIED

Waveform **Recording Card** NX-28WR

NX-28WR is a program card that provides the NA-28 with recording functions. Using the NA-28 and NX-28WR in combination makes it possible to measure sound pressure levels together with sound pressure waveforms during frequency analysis. Since the data are recorded in uncompressed WAVE files, they can be handled with software*1 compatible with the WAVE and analyzed.

*1 Software may not be compatible depending on sampling frequencies.

If the software is not compatible, use a sampling converter to change sampling frequencies.

Sampling Frequencies & CF Card Recording Time

	128 MB	256 MB	2 GB
48 kHz	15 m	30 m	4 h 40 m
24 kHz	30 m	1 h	9 h 20 m
12 kHz	1 h	2 h 10 m	18 h 50 m
64 kHz	10 m	20 m	3 h 30 m
32 kHz	20 m	50 m	7 h
16 kHz	50 m	1 h 40 m	14 h 10 m

Recording time would be somewhat changed by the number of files including recording data

Replay of recorded sound - It is possible to immediately identify unnecessary or unknown sounds by listening to the recorded data*

*2 Using Windows Media Player

- I conducted sound analysis but there are irregularities in the analysis results and I don't know what causes them.
- I detected the sound of a police car siren during measurement of traffic noise and I would like to exclude it.
- I measured sound levels and would like to listen to specific events.

on the recorded waveforms using waveform analysis software

- I conducted 1/1 octave band analysis but I need to be able to conduct 1/3 octave band analysis
- I conducted 1/3 octave band analysis but I need to be able to conduct analyses in more detail by FFT.

or morading robording data.			
Specifications			
Sampling frequency			
Octave, 1/3 octave	48 kHz, 24 kHz, 12 kHz		
simultaneous analysis			
Sound meter, octave analysis,	64 kHz, 32 kHz, 16 kHz		
1/3 octave analysis			
Quantization bit length	16 bit		
Data format	WAVE		
Frequency weighting	Z weighting (flat response) (fixed)		
Recording functions			
Event mode	Level recording, interval recording,		
	manual recording		
Total mode	Total recording		
Simultaneous use with Building			
Acoustics Card NX-28BA			
During sound insulation and	Total recording		
impact sound measurement			
During reverberation time	Total recording		
measurement	with pre-trigger (1 s)		

Replay and reanalysis cannot be made with the NA-28 unit.

Software

Recorded data by NX-28WR can be displayed and analyzed using optional software.

Optional accessory

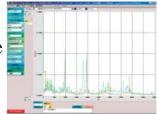

Waveform processing software **DA-20PA1**

Octave band analysis screen

Optional accessory Waveform

analysis software CAT-WAVE

Spectrum map screen

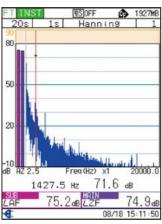

NX-28FT program card adds FFT analysis capability to NA-28.

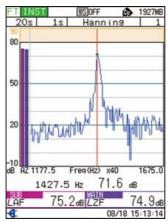

- Analysis frequency range: 20 kHz (fixed)
 Number of analysis lines: 8,000 (fixed) (frame time 400 ms, frequency resolution 2.5 Hz)

Combination with NX-28WR

FFT Analysis Card NX-28FT

Measurement screen (zoom factor x1)

Measurement screen (zoom factor x40)

Specifications		
Standard compliance	ISO 1996-2: 2007 Annex C *1	
Measurement mode	Main channel all-pass value and FFT analysis	
(FFT mode)	Sub-channel all-pass value	
Measurement items	Simultaneous measurement of INST and LIN or MAX	
	Measurement time 1 to 999 seconds	
Dynamic range	100 dB	
Analysis frequency range	20 kHz (fixed)	
Time window functions	Hanning, Rectangular	
Number of spectrum lines	8,000 (fixed) (frame time 400 ms, frequency resolution 2.5 Hz)	
Sampling frequency	48 kHz (fixed)	
Display		
Measurement screen	Simultaneous display of FFT analysis result and all-pass level	
Number of FFT display lines	200	
Zoom ratio	x1, x2, x5, x10, x20, x40	
Top list screen	List display of frequency and level values for top 20 lines, in descending order	
Trigger	Controls start of measurement and memory store operation	
Level trigger	Measurement starts when threshold level (selectable in 1	
	dB steps) is exceeded, and ends after preset	
	measurement time has elapsed. Trigger source: main	
	channel all-pass value only. Slope fixed to +.	
External trigger	Measurement starts at falling edge of logic level signal supplied to trigger input	
Store function		
Manual store	Stores measurement results.	
Number of data sets		
CF card*2	Max. 20 store names, with up to 100 data sets each	
	(Store to internal memory not supported)	

Waveform data stored together with manual store data on CF card. *1 Only frequency analysis is performed on unit. Tonal index calculation is performed on computer. *2 Use only RION supplied cards for assured operation.

Allows waveform recording under measurements for LIN, MAX.

Building Acoustic Card NX-28BA

NX-28BA is a program card used in NA-28 for simple and easy measurement of airborne and floor impact sound insulation of buildings and the reverberation time.

The measurements conforming to ISO and single-number quantities can also be calculated by the main body of NA-28. Data is stored as text files.

Furthermore, when used in conjunction with the waveform recording card NX-28WR, sound waveforms during measurement can be recorded simultaneously.

Applicable specifications

ISO 140-4 Acoustics - Measurement of sound insulation in buildings and of building elements - Part 4: Field measurements of airborne sound insulation between rooms

ISO 140-7 Acoustics - Measurement of sound insulation in buildings and of building elements - Part 7: Field measurements of impact sound insulation of floors

ISO 717-1 Acoustics - Rating of sound insulation in buildings and of building elements - Part 1: Airborne sound insulation

ISO 717-2 Acoustics - Rating of sound insulation in buildings and of building elements - Part 2: Impact sound insulation

ISO 140-5* Acoustics – Measurement of sound insulation in buildings and of building elements – Part 5: Field measurements of airborne sound insulation of façade elements and façades

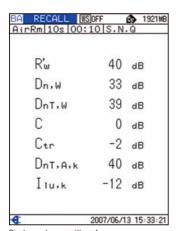

ISO 16032* Acoustics – Measurement of sound pressure level from service equipment in buildings – Engineering method

*The main body performs measurement only.

Measurement starts with the trigger level (1 dB intervals) as threshold and stops when the set measurement time elapses. Slope +/- is set. 1 time only measurement when the trigger level is exceeded. Sets start time and trigger repeat interval. After the start key is pressed, the time until the start of the measurement or trigger detection is set. 1 sec intervals within the range of 0 to 10 sec Measurement is temporarily suspended by pressing the pause key and the previous 5 seconds of data is eliminated from the calculation. The sound level or calculation results are recorded in the manual or auto-store mode. Data is recorded either in the intermal memory or CF carc

Manu	ial store	Manual recording of measurement results per address together with the measurement start time	
Re	ecord data count		
Internal memory		Maximum 1 000 sets	
CF card*		Maximum 1 000 sets per store name, maximum 100 store names can be store	
Auto store		Continuous recording of measurement results at the set time interval (It is possible to append 4 types of marker data in order to be able to identify events that occur while recording) Pause does not function during auto-storage	
Αι	uto 1		
	Measurement time	Maximum time: 1 000 hours (when using the CF card, refer to the following if using internal memory)	
	Sound level meter mode	Continuous recording in the CF card every 100 ms of L_{P} , L_{eq} , L_{max} and L_{min} as 1 se It is not possible to record sub-channel measurement results.	
	Sampling cycle	100 ms (L _ρ , L _{eq} , L _{max} , L _{min}) only	
	when using internal memory	Maximum time: 3 hours	
	Analyzer mode	Continuous recording in CF card instantaneous sound pressure level (L_ρ) in each band level and all-pass values	
	Main channel	All-pass values and band level values	
	Sub-channel	All-pass values only	
	Sampling cycle	1 ms to 1 sec, Leq,1s	
	when using internal memory	Maximum 10 000 sets (1 sec or, for Leq,1s, 2.7 hours)	
Αι	uto 2		
	Sound level meter mode	Continuous recording in CF card of main channel and sub-channel all-pas values and measurement start time for each measurement time	
Analyzer mode		Continuous recording in CF card of main channel band levels and all-pass values and sub-channel all-pass values and measurement start time for each measurement time	
	Record data count	Internal memory: Maximum 1 000 sets CF card: Maximum 300 000 sets	
Data	recall	Stored data access and time/level display (selected frequency band 1 only	
Mem	ory store of settings	Maximum 5 sets of settings can be stored in internal memory and retrieved Start-up is possible under file setting conditions stored in the CF card in advance.	
nput	/output		
A	C output	Selection and output of all-pass signals of either the main channel or sub-channel	
	Output voltage	1 V (effective value) at range full scale	
	Output resistance	600 Ω	
	Load resistance	10 kΩ or more	
D	C output	Selection and output of all-pass signals of either the main channel or sub-channel	
	Output voltage	3.0 V, 25 mV/dB at range full scale	
	Output resistance	50 Ω	
	Load resistance	10 kΩ or more	
Co	omparator output	Open collector output. Determination is also possible at the band level The terminal is also used for the external trigger.	
	Maximum applied voltage	24 V	
	Maximum driving current	50 mA	
External trigger input		Falling edge is detected at 0V to 5 V logic level. The terminal is also used for the comparator.	
USB		Besides connection to a PC as a storage device, it is also possible to use communication device class and execute control by communication commands (however, settings relating to the transfer of stored data and storage action are not possible with communication commands).	
Remote control reception		Control of NA-28 by infrared remote control (remote control NA-27RC1, optional)	
Power supply		Four IEC R14P (size"C") batteries or external power supply	
	ting time (23 °C, normal ting conditions)	When following not functioning; sub-channel, backlight, AC output, DC output, USB function, remote-control, autostore	
Manganese batteries Alkaline batteries AC adapter External power supply voltage		R14PU, 6 hours	
		LR14, 16 hours (10 hours if backlight is continuously activated) NC-94B	
		5 V to 6 V (rated voltage: 6 V)	
Consumption current		230 mA (during normal operation at rated voltage)	
Ambient conditions for operation			
	nsions, weight	331 (H) ×89 (W) ×51 (D) mm, approx. 730 g (including batteries)	
	lied accessories	Memory card (128 MB) MC-12CF1 × 1, Storage case × 1, Soft case × 1, AC adapter NC-94B × 1, Windscreen WS-10 × 1, BNC-RCA cable CC-24 × 1,	

Options

Optiono	
name	model
Building acoustic card	NX-28BA
Waveform recording card	NX-28WR
FFT analysis card	NX-28FT
Remote control	NA-27RC1
Sound calibrator	NC-74
Memory card	128 MB, 256 MB, 2 GB
Battery pack	BP-21
Dual output adaptor	CC-59S01

^{*} Use only RION supplied cards for assured operation.
